

RecruitManager™ - A complete, affordable recruiting solution for government agencies

As a government agency, you have limited time and resources to get the job done and keep your recruiting management processes running. The recruiting process can be daunting. How do you keep track of candidate information, including test scores, government forms completed, etc? RecruitManager™ can help you manage all of this information as well as the process as a whole. Whether using the stand-alone application or the web-based tool, you can make the recruiting process easier and more efficient with RecruitManager.

With RecruitManager™ you can standardize candidate information and communications with familiar Microsoft technology that works the way your users work, adapts to the way you do recruiting, and works the way IT expects it to.

Manage candidate information more easily

RecruitManager automatically protects your candidate information, allowing you to spend more time focusing on your recruitment and approval processes and less time and money on technology issues.

- Use Microsoft Office Outlook® to send and manage e-mail, store candidate contacts and manage your appointment calendar without having to switch between applications.
- Centralize candidate information. Keep candidate information in a single place. Establish a single view of candidate relationships across your organization.
- Schedule appointments and meetings. Arrive prepared for important candidate meetings
- Unify candidate e-mail and responses. Say good-bye to “copy and paste” for integrating your inbox and Recruiting system e-mail. Automatically capture entire discussion threads within your candidate history records.

Customize to your style of working

Access the information you use most often. Select the workplace profile that delivers instant-access to your candidate information and activities

- Take your candidates everywhere. Don't lose a step when working away from the office. Enhanced data synchronization provides full access to your candidate information on your laptop or mobile device.

Create demand and drive results

Target your recruiting efforts. Fine tune recruiting campaigns and offers that generate the greatest return. Use intelligent list and segmentation tools to effectively reach prospective candidates while at the same time reducing ineffective recruiting activities.

- Fuel your recruiting engine. Fill your candidate pipeline with qualified leads and opportunities.
- Measure campaign effectiveness. Know which offers and recruiting efforts generate results. Measure the effectiveness of each campaign activity by tracking response rates, interest levels and successful hires from each originating campaign.

Optimize data views and queries

Quickly find what you are looking for when you need it. Achieve faster results when searching across large volumes of candidate information.

Get flexible and extensible reporting

RecruitManager provides some stock reports out of the box and it is easy to build new custom reports for each agency since it uses Microsoft SQL Server Reporting Services.

Filter offline data for synchronization

Quickly synchronize offline data. Pre-filter datasets for offline usage and access.

Use zero footprint and zero-touch clients

Installs automatically, with or without a local data store. Zero footprint browser client provides a rich experience with full application capabilities.

System Requirements

- Microsoft Office 2003
- Microsoft Dynamics CRM 3.0
- Microsoft SQL Server 2000/2005
- Windows Server 2000/2003
